

Jain ENT Hospital, Deesa

Prof. Dr. Devendra M. Jain — MBBS, MS (ENT)
Otorhinolaryngologist & Head–Neck Cancer Surgeon

Post-Operative Care Checklist

First 24 Hours

- ☐ Rest in a quiet, comfortable space. Avoid strenuous activity.
- ☐ Keep the operative site clean and dry. Do not touch dressings.
- ☐ Take prescribed medication exactly as instructed (antibiotics, pain relief).
- ☐ .
- ☐ Apply cold compress as advised to reduce swelling.
- ☐ Stick to a soft, lukewarm diet. Avoid hot, spicy or hard foods.
- ☐ Sleep with head slightly elevated (extra pillow) to reduce swelling.

First Week

- ☐ Avoid blowing the nose forcefully (after nasal/sinus surgery).
- ☐ No swimming, heavy lifting (>5 kg), or vigorous exercise.
- ☐ Avoid smoking and alcohol — they slow healing.
- ☐ Maintain oral hygiene with gentle saline rinses if advised.
- ☐ Continue all prescribed medicines. Do not skip antibiotics.
- ☐ Attend the scheduled follow-up visit on the recommended date.

Warning Signs — Contact the Clinic Immediately

- ☐ Heavy bleeding that does not stop with gentle pressure.
- ☐ Fever above 101°F (38.5°C) lasting more than 24 hours.
- ☐ Sudden severe pain not relieved by prescribed medication.
- ☐ Swelling, redness or pus discharge at operative site.
- ☐ Difficulty breathing, swallowing, or persistent vomiting.
- ☐ Sudden hearing loss or severe dizziness after ear surgery.

Long-Term Recovery

- ☐ Complete the full course of all prescribed medication.
- ☐ Avoid dusty environments and pollutants for 2–4 weeks.
- ☐ Resume normal work only after clearance from the doctor.
- ☐ For cancer-surgery patients: attend all oncology follow-ups.
- ☐ Maintain a balanced, protein-rich diet to support healing.
- ☐ Hydrate well — at least 2 litres of water daily.
